

Round Table

Development of the long term vision

Luisa Franconi

Istat, Unit on Methods for statistical data confidentiality

Workshop decentralised access to EU microdata, 17-18 June 2010

Access to EU microdata: type of actors

- Data archives;
- NSIs;
- Other producers of official statistics:
 - Institutes of research
 - Central Banks
 - Inland revenue (?!)
 - ...
- Eurostat;
- Users

Each category is not homogeneous
Nationally operates in different contexts

The aim: take the best out of everyone

- A question on categories of data;
 - categorisation is “vertical or horizontal”?
 - “inner” characteristics of data: types of variables;
 - LSF is category 1
 - Health survey is category 2
 - measuring risk of disclosure
 - LFS with nationality of birth and local area (street level) maybe is not category 1 ...

Microdata

- More administrative microdata
- fiscal data
- integrated data:
 - linked employer employees data

Again coordination!

- Network of different subjects:
 - - “open flexible and collaborative”
 - that make best use of
 - what has already being developed
 - peculiarity of the EU: Eurostat
