# three thoughts

---

# Microdata access in 2030

- Remote Access 365/24 to micro- and all relevant metadata
- Microdata are a combination of administrative, biological and survey data with a core of household or/and enterprise register
- Service around the data use starts early, statistic in the school, microdata use at the university, Master of official statistic

# The way into the future

## Projects

- Data without Boundaries, Decentralised Access, Workshop on Data Access

## Harmonisation

- legal rules, disclosure rules

## Data production

- integrated micro data files, administrative versus survey

# Who pay the bill?

- Resarcher
- NSI
- Official funding of research

Data without  
Boundaries

needs

thinking without  
borders
