
Before we start, some important information

- CBS is the only official statistics office in the Netherlands.
- We are (mainly) a register-based statistics office.
- Optimal usage of our statistical output and microdata is a core value of CBS.
- We are not just a NSI,

  we are a news agency

Under which legal base is access to microdata possible?

- CBS-law: DG can accredit organizations:
  - Dutch universities and official planning agencies.
  - Other organizations with a (primary) research goal and a good reputation. Must have no adminstrative tasks.
- Researchers working at an accredited organisation can get access after signing non-disclosure agreement and passing awareness test.
- Projectproposals are mandatory. Need-to-know based access, outputchecks.

Under which legal bases access to microdata is possible?

In short:

Granted access for 5 years

Employed at…

Disclosure agreement

Awarenesstest

Projectproposal

Need-to-know

Output check

Types of data available

- Pseudonomyzed data from hundreds of administrations and registers with 100% coverage
- Datasets can be linked.

Can researchers from abroad use Dutch microdata?

- Yes.

If so: under which conditions?

- The same as Dutch researchers.

Experiences with misuse of microdata by researchers?

- Some. Bypassing the outputcheck by copying from the screen, bypassing need-to-know by trying out a new project using data in another project.
- Combination of enthusiasm and ignorance, hence awareness testing.
- Researchers pointing out weaknesses also happens.

How to access Dutch microdata?

24/7 in 10 easy steps:

1. Find a private spot
2. Start computer
3. Connect to internet (secure WiFi or wired)
4. Start Virtual Private Network (VPN)
5. Start Citrix, enter SecurID token code
6. Enter username, password
7. Answer awareness question
8. Select project using project code
9. Projectspecific username, password
10. Enter TAN-code

In 2019 we supported:

- 629 projects,
- involving 1143 researchers
- from 190 different organizations
- using 4582 datasets
- generating 1843 outputs.

Trend: number of projects

Advice about research
Microdata: Conducting your own research
Authorised institutions can conduct their own research using microdata sets of Statistics Netherlands (CBS). Microdata are linkable data at the level of individuals, companies and addresses, which can be made available to researchers under strict conditions for statistical research. To obtain access for research purposes, please complete and submit an Application form research project. The complete results of your research must be made directly available to interested parties, as a rule at no charge.

Which organisations are allowed to work with microdata?
The following organisations may be granted access to CBS microdata:
– Dutch universities.
– Institutes for scientific research.
